intuitive CLOUD

Introducing the next evolution in cloud phone systems, **Intuitive Cloud** has broken the mold in what you expect from a cloud PBX product. Our unique product offering gives you the freedom and reliability you have been asking for, allowing you to choose which phones you use and what backend VoIP provider delivers your phone calls. No longer do you have to pay a high cost per extension for unlimited service on each extension, simply subscribe to the number of phone lines you need and start raking in the savings.

Built on top of one of the most feature rich Unified Communications platforms on the market **Intuitive Cloud** offers state of the art features unsurpassed in the industry. Our complete solution has been designed from the ground up to be simple and easy to use. No longer do you need a computer degree to operate your phone system.

With **Intuitive Cloud** you'll get excellent call quality and reliability. An implementation team is there to ensure a smooth transition for you to set up and manage your new phone system.

Intuitive Cloud
Saves you money
on your hosted VoIP Phone Service

With **Intuitive Cloud**, businesses no longer need to worry about the significant cost of managing and maintaining premise based communications systems. You can focus on your core business, allowing **Intuitive Cloud** to deliver your communications solutions. With state-of-the-art features; easy support for mobile, remote, and home employees; and built-in video, conferencing, call center, and unified messaging functionality, this solution gives your business great power and productivity across any type of phone system or location.

Gain instant access to your core functions and features from the central navigation on your computer's browser. If you order a desk phone, it will arrive in a few days ready to be auto-configured—just plug it into your Internet router and point it at your **Intuitive Cloud** IP. Or simply download a free app to use your smartphone, tablet or PC.

Communications made simple.

Improve collaboration and be more available to customers by simplifying the complexity of your existing phone systems. Our cloud-based Voice over IP provides you with:

-- A reliable alternative to on-premises phone systems with in-house
   management.
-- Plug-and-play setup compatible with many broadband Internet services.
-- Seamless access to customers, partners, suppliers, and coworkers from
   virtually any location.
-- A robust environment that allows you to integrate both cloud users and
   premise based phone systems into the same solution.

All it takes to get started is an Internet connection and a phone, which you can provide yourself, or purchase or rent at affordable price points from **Intuitive Cloud**. Set up is quick—taking only minutes, instead of weeks other systems would require, with complex and costly hardware to install, maintain and upgrade.

Have your own VoIP provider?

■ No problem our pricing de-couples the service fees from the phone services allowing you to use our amazing VoIP services or the provider of your choice.

■ Our Intuitive VoIP phone service is the first in the industry to build intelligence right into the network routing. We analyze realtime network and voice quality data to deliver your calls through the optimum path to deliver superb audio quality.

■ We have a track record of innovation for the last ten years. The continuous innovations to our cloud service guarantees that you will always have the latest and greatest technology.

Have your own phones?

■ No problem we work with a wide range of phones and you don't even have to buy them from us.

■ Turning up and supporting remote offices is a breeze. Simply ship your employees phones and they can work wherever they have a quality internet connection.

■ You'll experience a noticeable improvement in voice quality with our high-definition quality voice phones.

■ Our business VoIP phones are so easy to set up, you'll be up and running within minutes - especially with the help of our friendly "Available" support team.
